ANNEX

Support Program for the National Productive System in the Area of Medical Equipment and Medical and Health Supplies and Technological Solutions within the framework of the Coronavirus Pandemic (COVID-19)

1. PURPOSE OF THE PROGRAM

The purpose of this program is to promote, through technical and financial assistance to industrial, commercial and service companies, entrepreneurs and public and private institutions that develop productive and technological solutions in the Argentine territory, mainly in the medical-health sector, whose purpose is to contribute to the approach, containment, treatment and mitigation of the Coronavirus COVID-19.

2. TARGET AUDIENCE

The direct beneficiaries of the Program are companies, suppliers of its productive value chain, entrepreneurs, public institutions and other productive units that make contributions in the area of medical and health equipment and supplies, as well as technological solutions and their development and implementation that helps the prevention, diagnosis, treatment, monitoring, control and / or other aspects related to the Coronavirus COVID-19.

Among them, those related to the production of medical equipment and its value chains, reagents and kits for diagnosis, health supplies, medicines and vaccines, personal hygiene products, digital platforms, among other health technologies and related services, that allow to approach and mitigate the current epidemiological emergency stand out.

3. ACTIONS

- a. Assist entrepreneurs and companies and their supply chain that need to scale up their production due to the increased demand for medical-health products and services.
- b. Assist companies, entrepreneurs and institutions with the possibility of developing technological and/or innovative solutions to prevent, diagnose, treat, monitor and/or devices that optimize the health response to the Coronavirus COVID-19.
- c. Promote the adaptation of processes and products for companies and their suppliers that require a reconversion to produce goods and services needed in the framework of the health emergency and social distancing.
- d. Improve the productivity of companies that produce or provide technological services linked to companies in the supply, medical equipment and production chain of the pharmaceutical sector.
- e. Boost the formation of associative groups or clusters whose purpose is the production of goods and / or services intended to contain and mitigate the Coronavirus COVID-19 pandemic.
